---

**ALTITUDE** 1300 - 1600m

---

*Ngutu Factory* processes coffee cherry from local farmers who are members of the *Raikamba Farmers Cooperative Society*. This cooperative has 4,000 farming members across seven factories. Farmer members deliver their cherry to the factory on the day it's harvested where it is sorted before being de-pulped, fermented, washed and sun-dried.

## NGUTU FACTORY, KENYA.

The *Ngutu Factory* is managed by an elected body of seven committee members and overseen by a secretary manager. There are 28 permanent staff at the factory. This Factory structure is common in Kenya and provides access and expertise to small producers who on average raise only 200 trees on farms that are between 0.2 to 0.4 hectares in size.
