PROCESS Fully Washed

ALTITUDE 1800-1950m

The *Jigesa Washing Station* is one of 4 privately owned washing stations run by Testi Coffee, a family owned company founded by Mr Faysel Yonis. The company is committed to maximising the potential of Ethiopian coffee and enriching the lives of the communities connected to it.

SMALL PRODUCERS OF JIGESA

The Jigesa Washing Station services 850 small producers. Mr Faysel, the founder of the washing station, strongly believes that the increased rewards for the producers should be shared by the entire community. To this end, Testi Coffee has launched an initiative called Project Direct which focuses on directly helping coffee farmers, their families and surrounding communities in tangible and positive ways – like building schools and access to clean water.
